Editor's note: Some of the interactive features of Kathryn's work aren't fully functional embedded in this website. If you want to interact with the code, please see this piece [on Observable](#).

Kathryn Blair is a PhD candidate in the Computational Media Design program at the University of Calgary, where she completed her Master of Fine Arts in 2018. Her work provides contexts in which people can explore the way our societies use algorithmic decision-making through participatory art experiences. She also creates wearable art exploring the relationship between the body and technology using biosensors that control light, sound and motion. She has participated in the Calgary-based tech fashion show *Make Fashion* since 2013, and has shown her work in Alberta, British Columbia, China, the United States and Ireland.
